Bungalow and Carrow Magnetite Project Metallurgical Testwork Reports

Client

Centrex Metals

Project Location

Eyre Peninsula, South Australia

Project Summary

The services provided by Engenium covered the overall Program Management and other services involved in the preparation of two Metallurgical Testwork Reports.

This included an initial DTR Procedure Determination Program for the Carrow Project and a detailed Metallurgical Testwork Program for the Bungalow Magnetite Project. Both located in South Australia.

Engenium provided Magnetite Process Testwork and Process Engineering Technical Services for both projects.

Following the work Engenium provided on the projects, Centrex Metals decided to move into the Pre-Feasibility Assessments and continue with the drilling campaign.
