Mbalam Iron Ore Project Peer Review of Pre-Feasibility Study

Client

Sundance Resources

Project Location

Cameroon, West Africa

Project Summary

Sundance Resources are developing the Mbalam Iron Ore Mine in Cameroon. The project will require the construction of some 557 km of railway to service the proposed Iron Ore mine.

Engenium, through its Rail Project Delivery vehicle Calibre Engenium Joint Venture, were engaged in 2009 to conduct a Peer Review of a Pre-Feasibility Study reviewing rail infrastructure, route selection and capital and operating cost estimates.

Following the Peer Review, we were engaged to take over the Engineering and Study Management of the rail project.

Engenium divested its interest in Calibre Engenium in 2010.
